6+ Years of Professional Experience

Tel: +905411017281 | arashforus@yahoo.com | [linkedin.com/in/arashforus](https://www.linkedin.com/in/arashforus)

Portfolio: arashsohrabi.com

Turkey, Open to Relocation

Qualifications and Skills

- **Programming Languages:** Kotlin, Java, PHP, HTML/CSS
- **Android Development:** Android SDK, Android Studio, Jetpack Compose, Multithreading, Gradle, LiveData, Dependency Injection (DI), RESTful APIs
- **Libraries and Frameworks:** Retrofit, Room, Glide, Volley, DataStore, Dagger Hilt, Firebase, Lottie, Google AdMob, Play Billing, Google Maps SDK
- **Databases and Tools:** MS SQL, SQLite, MongoDB, PostgreSQL, Git, MVVM Architecture, Agile (Scrum, Kanban), Design Patterns, OOP (Object Oriented Programming)
- **Other Skills:** SEO, WordPress (plugins), Hosting & Domain Management, AI-Assisted Software Development
- **Soft Skills:** Teamwork, independent problem-solving, proactive research, adaptability under pressure, and a strong problem-solving mindset

Work Experience

QRdish Platform | Founder & Full-Stack Developer (qrdish.app)

2026 - Now

- Designed and developed a full-stack SaaS restaurant management platform independently using AI-assisted workflows.
- Built customer-facing and administrative systems from scratch using React, TypeScript, Node.js, Express, PostgreSQL, and Tailwind CSS.
- Developed a multilingual QR-based digital restaurant menu platform with loyalty systems, QR access, and advanced admin tools.
- Architected a server-side management platform for customers, software licenses, analytics, support, and platform operations.
- Implemented REST APIs, authentication systems, PostgreSQL architecture, file uploads, and scalable infrastructure.
- Managed the entire software lifecycle independently including architecture, deployment, backend/frontend development, and infrastructure.

Expad Platform | Founder and Developer (expad.app)

2022 - Now

- Identified the need for a multilingual platform connecting users to jobs, services, places, and goods based on country and language, validated the idea and defined features based on users' needs.

- Designed an animated user interface (UI) through creating wireframes and prototypes, and architected the frontend, backend, utilizing MVVM and database architecture.
- Developed Android app using Kotlin and Jetpack Compose. Key features include language selection, user authentication, profile management, ad submissions, ad viewing, purchasing packages with Google Play Billing, and various user interactions.
- Developed the website frontend with Kotlin, Ktor, and Free Marker, and optimized it for phone screens, developed the backend using Kotlin and Ktor as the API framework, and deployed the website and the backend on the Google Cloud Platform (GCP).
- Published the Android app on the Google Play Store fulfilling all store guidelines and requirements, and releasing updates to add new features, fix the bugs, and improve the performance.

NeaRoom Android Application | Founder and Developer (nearoom.app)

2020 - Now

- Recognized an important gap in real-time communications for specific communities, leading to the development of a niche messaging platform which provides various location-based features along with animated wallpapers.
- Designed user interface (UI) and user experience (UX) through creating wireframes and prototypes, and architected the frontend, backend, and data storage solutions for the platform.
- Developed the Android app and built the entire user interface and client-side logic using Kotlin. Providing key features such as registering and modifying profiles, creating, searching, and modifying location-based rooms, having chat with friends and room members, customizable live backgrounds, sharing different file types in a custom-built gallery, image and video editors, and audio player.
- Developed the backend in PHP with a REST architecture, ensuring efficient data handling and real-time updates, integrating third-party APIs for features like SMS verification, email confirmation, and location services.

Courses and Certificates

- [Kotlin for Java Developers \(JETBRAINS\)](#)
- [Design Patterns \(University of Alberta\)](#)
- [Foundations of Project Management \(Google\)](#)

Additional Experience

- Founded, developed, and managed Galleriha website since 2014.
- Worked as Digital Marketing Manager for Kaman Jade Abrisham travel agency for 1 year (2017-2018)
- Developed websites and designed logos, banners, and social media advertisements since 2011.

Education

BSc and MSc of Civil Engineering

2009 - 2017
